

Master Glazing

CASEMENT SYSTEM

The casement system is a type of window where the sash is hinged on hinges and can rotate around a vertical axis. This window model allows smooth opening either outward or inward, providing efficient ventilation and an aesthetic appearance. Typically equipped with effective seals to protect against drafts and heat loss, casement windows are popular in both residential and commercial construction.

BI-FOLD SYSTEM

Hinged window system with thermal break and a slim sideline of just 65 mm, which allows a great brightness inside the room. With a modern aesthetic of straight lines, it has profiles tailored for residential and commercial projects, and both for new build and renovation. This system also stands out for

- It has an excellent energy efficiency: window transmittance from 1,0 (W/m²K) *
- Noise protection: up to 45 dB acoustic reduction.
- Maximum tightness: CLASS E1200, which means during 75 minutes, total affluent of 450 liters and wind velocity of 161 km/h, there´s no water intake.

CATEGORIES ACHIEVED AT TEST CENTRE*

| | |
|------------------|-------------|
| Air permeability | CLASS 4 |
| Water tightness | CLASS E1200 |
| Wind resistance | CE 2400 |

OPENING POSSIBILITIES

Practicable, oscilo-batiente y abatible.

*CONSULT TYPOLOGY, DIMENSION AND GLASS.

Comfort ensures the resilience of its enclosing systems against atmospheric agents, rigorously tested in our Technological Center for optimal performance in watertightness, air permeability, and wind loads.

Energy Efficiency addresses the demand for energy-saving in buildings, providing high-insulation systems tailored to diverse climatic conditions, enhancing residential comfort while reducing heating and air conditioning costs.

Silence prioritizes acoustic insulation, utilizing advanced technology to create a serene and pollution-free indoor environment, ensuring peace and relaxation within your home.

Colours offers an extensive range of finishes, including powder coating, metallic, textured, wood effect, and anodized options, allowing for over 100 finishes. This diverse palette enables the creation of a harmonious color scheme at home, adhering to quality labels such as QUALICOAT, SEA-SIDE, QUALIDECO, and QUALANOD.

Design crafts bespoke windows and façades, combining avant-garde aesthetics with functionality to meet the unique demands of each project, providing creative solutions to both technical and aesthetic needs.

Durability emphasizes the enduring nature of aluminum, the most durable and long-lasting material for enclosures, ensuring strength and longevity that withstands the test of time.
